

# *Birthday and Anniversary Organizer*

You may wonder why we have bothered to put a birthday and anniversary organizer as part of a series of expat checklists - but those of us who have spent more than a year away from home can tell you that birthdays, anniversaries and celebrations are the trickiest times emotionally.

Staying in contact and remembering important dates are essential in maintaining a connection with loved ones, and shows them just how much you value their role in your lives. It also has the happy consequence of prompting cards etc... in return, which, especially for children, can mean the difference between a very happy birthday and a complete emotional meltdown...

If you have a poor memory, struggle with international mail or are generally rubbish at this stuff, consider signing on with an online card service like Moonpig.com, who allow you to select and send cards online, store addresses and will even send you an email reminder of upcoming events. In the meantime, here's the Defining Moves low-tech, even-less-effort version.
